There is not taught or disclosed in the prior art a laser system including imaging means for imaging a beam of the laser onto an optic material, where the imaging means includes an imaging system that may be described by an ABCD matrix where D is substantially zero (i.e. where the imaging system images light onto the optical material at an angle independent of the input angle).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
